

PALM BEACH COUNTY TRAFFIC DIVISION HISTORIC TRAFFIC GROWTH TABLE

CURRENT YEAR – 2019

(2019 counts must be used in traffic studies received by the Traffic Division on or after July 10, 2019)

This document was developed as supporting data for use in traffic impact studies seeking to demonstrate compliance with Article 12 of the Unified Land Development Code, the Traffic Performance Standards. This table shows historical peak season traffic counts, Daily and Peak Hour, from 2014 to 2019 (peak hour only for the latest year) as well as a calculated growth rate for each count station. A 3-year timeframe was used to calculate the historic growth rate shown.

Please note that the counts, in most cases, reflect a snapshot of just one full day mid-week volumes. Though great caution was exercised to avoid impacts of construction/road closures in the immediate vicinity on these traffic counts, there is no guarantee that a faraway event has not influenced the counts indirectly. Engineering judgment should be exercised in the use of counts where growth rates are out of the ordinary, particularly in cases where the growth rates are negative, too high, etc. For a lengthy build out date (generally more than 5 years), use of an area wide growth rate might be more appropriate. Consult Article 12 of the ULDC regarding use of traffic counts and historical growth rates in the traffic impact studies.

If current year counts is not listed in this document (or through FDOT's yearly Count Program) but is required for the Traffic Impact Study, a consultation with the County must be done before commencing the study to determine how those counts may be collected.

Palm Beach County

Historic Peak Season Traffic Counts (2014-2019)
