561.616-7017

Instructor Dawn Altman, RN, EMT 25+ Years of experience teaching ECG classes for health-care personnel. She is thoroughly familiar with prevailing field and hospital protocols.

A review of 12 lead concepts, and how ECG relates to the heart's anatomy. This class prepares the beginner student for other 12 lead topics, and gives experienced students the solid foundation needed to take on some of the more advanced concepts.
