

Background and Policy Issues: FDOT has been designated by Florida's Governor to administer the Section 5310 Program funds for the purpose of assisting grant recipients in meeting transportation needs of the elderly and persons with disabilities. If awarded, Palm Tran will receive an award letter with an updated grant amount to be executed by the County Administrator. Funds will be used for the replacement of paratransit vehicles that have reached the end of their useful life. Under Section 5310, funded vehicles/equipment must be used to transport seniors and individuals with disabilities within the area for which they were awarded.

The proposed deviated route service aims to improve mobility for seniors and individuals with disabilities along the designated route. Delray Beach was selected as the location for this program due to the high demand for paratransit trips in the area. By introducing an additional mobility option, we will offer seniors and individuals with disabilities a more cost-effective alternative to the existing paratransit service provided by Palm Tran. The proposed deviated route service is designed to significantly enhance transportation options for seniors and individuals with disabilities living along the specified route. By introducing this new mobility option, we aim to provide a more accessible and affordable alternative for seniors and individuals with disabilities, making it easier for them to travel for essential activities such as medical appointments, grocery shopping, and social engagements, thereby improving their overall quality of life. This service will serve as a valuable complement to the current paratransit offerings provided by Palm Tran, ensuring that these vulnerable populations have reliable access to transportation solutions. Within the service area, there are 22,900 people, 25% of whom are seniors, and 12% live with a disability. In addition, the route traverses several senior living communities and truncates at a major retail activity center. The estimated cost of this service is \$140,000, with three (3) trips in the morning and three trips in the evening on weekdays.
